

# COPON

## CASE HISTORY

**PROJECT TITLE** LUL CANARY WHARF STATION  
HAND RAILS EMERGENCY EXITS & STEEL DOORS

LUL required a coating system for handrails within the Canary Wharf Station. The coating had to be highly durable in terms of long term maintenance free coating protection, impact resistance and resistant to repetitive cleaning. Most importantly the coating required excellent limited fire hazard performance including smoke and toxic fume emissions.

Copon EA9WB primer overcoated by Copon EA9WB finish in yellow was chosen which meets each of the above requirements, as well as being environmentally friendly and safe to apply.

**Client** - LUL - Jubilee Line Extension  
**Contractors** - Tarmac Bachy JV

Other LUL projects where the Copon Hycote EA9WB coating system has been successfully utilised:

**Canada Water Station**  
Handrails - Sept 1999  
Contractor - Sharrocks Ltd

**Bermondsey Station**  
Handrails - Summer 1999  
Contractor - AOKI Soletanche JV

**Stratford Station**  
Escalators - Summer 1999  
Contractor - PLC Services

**Westminster Station**  
Handrails - Summer 1999  
Contractor - Balfour Beatty Amec JV

**Waterloo Station**  
Handrails - Jan 2000  
Contractor - Balfour Beatty Amec JV
