

COPON

CASE HISTORY

PROJECT: CONCRETE WATER TANKS & RESERVOIRS
TITLE: LINING TO DWI REGULATION 25 (1) (A)

Copon Hycote 165PW fully meets the requirements of DWI Regulation 25 (1) (a) of the Water Supply (Water Quality) Regulations 1989.

Spray applied by plural component hot airless spray equipment, this solvent free polyurethane has excellent adhesion to steel and concrete and will accommodate structural and thermal expansion and contraction.

Copon Hycote 165PW is extremely fast curing even at low temperatures, has a high degree of flexibility and tensile strength and can be applied throughout the year under almost all prevailing site and environmental conditions.

Rapid return to service and extended service life are major features of this high performance solvent free urethane.

Copon Hycote 165PW is applied by authorised and experienced applicators under the direction and supervision of the COPON - COVAC DIVISION.
