

COPON

CASE HISTORY

PROJECT TITLE RAILTRACK - KEW RAIL BRIDGE
SUPPORT CROSS MEMBERS ON BRIDGE DECK

The Kew Bridge needed additional structural supporting cross members on the bridge deck. They required a coating system that could be applied in inclement weather conditions, provide long term corrosion protection and holds RT 98 accreditation.

Copon Hycote 152LV, a high build solvent free surface tolerant epoxy, meets each of the above requirements. The contractors Structural Steel Services Ltd were highly impressed by the ease of application & speed of cure in adverse weather conditions.

Client - Jackson Rail/Railtrack

Other bridges where Copon Hycote 152LV has been successfully utilised:

Harrow Bridge
Railtrack - March 2000

Manningtree Bridge
Railtrack - March 2000

Ely Bridge
Railtrack - Oct 1999

Settle Station Footbridge
Railtrack - May 1999

Arundle Bridge
Railtrack - Nov 1998

Brockenhurst Rail Bridge
Railtrack - Oct 1997

Padge Rail Bridge
Railtrack - Oct 1995

JAN 1999
