

Book Your Assessment Now!

Like you, 3M Canada is committed to providing equipment, services, and information which helps promote the health and safety of all workers.

3M Visibility and Insulation Solutions is pleased to announce the launch of 3M Risk Assessment, an electronic needs assessment program designed to provide guidance for making decisions about the type of protective garments best suited for workers while on the job.

Based on a series of real-life situational questions specific to your work environment, the 3M Risk Assessment system creates and compiles a detailed recommendation report for you to consider as one tool in making future personal protective garment decisions. An electronic version of this report will be sent to you within 24 hours of completing the interview.

Appointments can be booked by contacting your local 3M Visibility & Insulation Solutions Sales Representatives. The assessment requires the assistance of a 3M Sales Rep and takes approximately 1 hour to complete.

To learn more, or request an assessment, please send an email to

3MRiskAssessment@mmm.com.
