3M™ Coban™ 2 Lite Compression System Application for the Scrotum

**Materials & Positioning**
- Select the 7,5cm (3 inch) or 10cm (4 inch) 3M™ Coban™ 2 Lite Compression Layer for the scrotal application depending on the size of the patient.

---

**Application of Comfort Foam Layer to Scrotum**

**Layer 1: Comfort Foam Layer**
- Apply this layer with the foam side against the skin with just enough tension to conform.
- Cover the skin with as thin of a layer as possible with no gaps.

**Layer 2: Compression Layer**
- Apply the compression layer with the foam side against the skin with just enough tension to conform.
- Cover the skin with as thin of a layer as possible with no gaps.

---

**Application of Compression Layer to Scrotum**

**Layer 1: Comfort Foam Layer**
- Apply this layer with the foam side against the skin with just enough tension to conform.
- Cover the skin with as thin of a layer as possible with no gaps.

**Layer 2: Compression Layer**
- Apply this layer with the foam side against the skin with just enough tension to conform.
- Cover the skin with as thin of a layer as possible with no gaps.

---

**3M™ Coban™ 2 Lite Compression System Application for the Penis (Method A)**

**Materials & Positioning**
- Select the 2,5cm (1 inch) 3M™ Coban™ 2 Lite Compression Layer.

---

**Application of Compression Layer to Penis**

**Compression Layer**
- Apply compression material with at least 2 layers with enough tension to provide support and lift of oedema.
- It is recommended that you hold the roll close to the body throughout the application for controlled, even compression.

---

**3M™ Coban™ 2 Lite Compression System Application for the Penis (Method B)**

**Materials & Positioning**
- For extreme oedema or when additional comfort is needed, select the 5cm (2 inch) 3M™ Coban™ 2 Lite Comfort Foam Layer and 5cm (2 inch) 3M™ Coban™ 2 Lite Compression Layer.
