

3M™ Asset and Inventory Tracking System Software

Imagine being able to track and monitor valuable assets, files and inventory all in one place. It's possible with the 3M Asset and Inventory Tracking System. This intuitive, easy-to-use, flexible tracking system is the perfect way to track and manage the assets most valuable to your business.

In today's business environment, knowing the location of your critical assets not only can enhance productivity but can mean the difference in meeting critical deadlines and satisfying your customers. The 3M Asset and Inventory Tracking System brings visibility to the location, condition, and history of your assets. The system enables easy import of existing asset records and when coupled with barcode or RFID components enables automated collection of asset movements. The 3M Asset and Inventory Tracking System Software is designed to work seamlessly with a growing number of data collection technologies (visit www.3Mtrackandtrace.com/tracking to find the latest options).

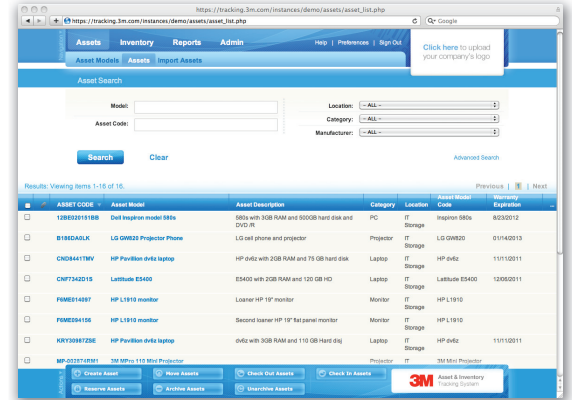

3M designed the Asset and Inventory Tracking System to allow you to focus on running your business with minimum effort. 3M hosts your data in our Tier III data center, and we manage your data using processes derived from ISO 17799/ISO 27002—an international standard for data security and business continuity.

Features

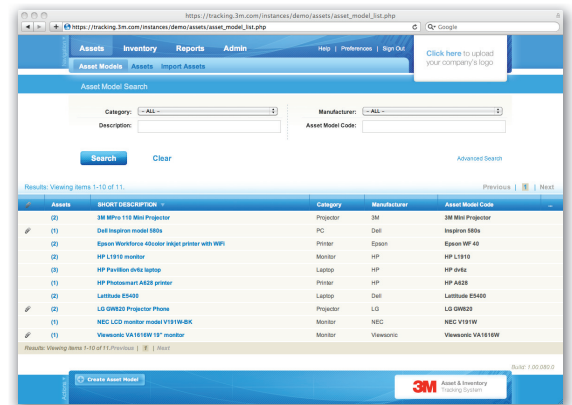

- Track and record the location and owner of an asset
- Attach documents to the asset record
- Record inventory levels of critical supplies
- Easily capture asset movement with RFID
- View the history of an asset
- Update the condition or performance of an asset

Benefits

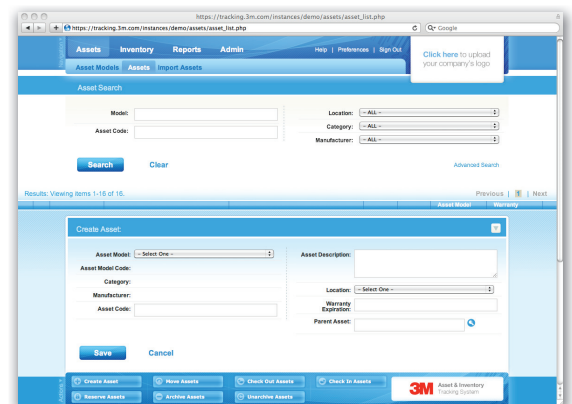

- Enhance productivity
- Enhance asset visibility across the company
- Help reduce lost or missing items
- Aids compliance efforts and reporting of assets
- Helps reduce time consuming paper systems
