Scotch-Brite™ High Shine Floor Pads

The high performance pads that clean
and shine your floors for longer.

Scotch-Brite™ High Shine Floor Pads

- Simple two-pad system for most of your floor care needs
- Cleans and shines your floors for up to 3x longer than other high performance pads
- High gloss finish and clarity at a lower cost
- Significant improvement in cleanliness
- No compromise on traction

For a floor that reflects well on you and your business.

Retailers, shopping malls, airports and hotels all view floor maintenance as essential to the customer experience and to how their brands are perceived. It's an important part of their business success.

And yet cleaning budgets continue to be squeezed. Recent trends, such as 24-hour opening and daytime cleaning, are putting ever-increasing pressure on contractors to deliver around the clock floor care maintenance at a lower cost and with minimal downtime. It's a real challenge.

And it's a challenge that 3M understands and continues to tackle with its on-going programme of product development. Scotch-Brite™ High Shine Floor Pads are the latest innovation in floor care solutions from 3M. Developed in response to demand from customers for high performance floor pads that boost productivity and lower costs, these premium pads can be used as a simple 2-pad system for the majority of floor care requirements.

Not only do they clean and polish marble, terrazzo, plastic and concrete floors to a brilliant gloss finish – they go on working for up to 3x longer than existing high performance floor pads, resulting in significant cost savings.

50 years of innovation.

Fifty years ago 3M revolutionized floor maintenance by introducing the world's first synthetic non-woven floor pads.

Now the company is setting new standards in high performance floor pads with Scotch-Brite™ High Shine Purple Floor Pad and Scotch-Brite™ High Shine Sienna Floor Pad.

Precision engineered for consistent, longer lasting performance, Scotch-Brite™ High Shine Floor Pads not only incorporate mineral abrasives on both surfaces of the pad for double-sided use, they are innovative in containing abrasives within the pad itself for even greater durability. The pads are made from a mix of fine and medium sized, high quality, synthetic fibres to provide maximum pad-to-floor contact and to produce a more consistent cleaning and polishing action.

How do Scotch-Brite™ High Shine Floor Pads last up to 3 times longer?

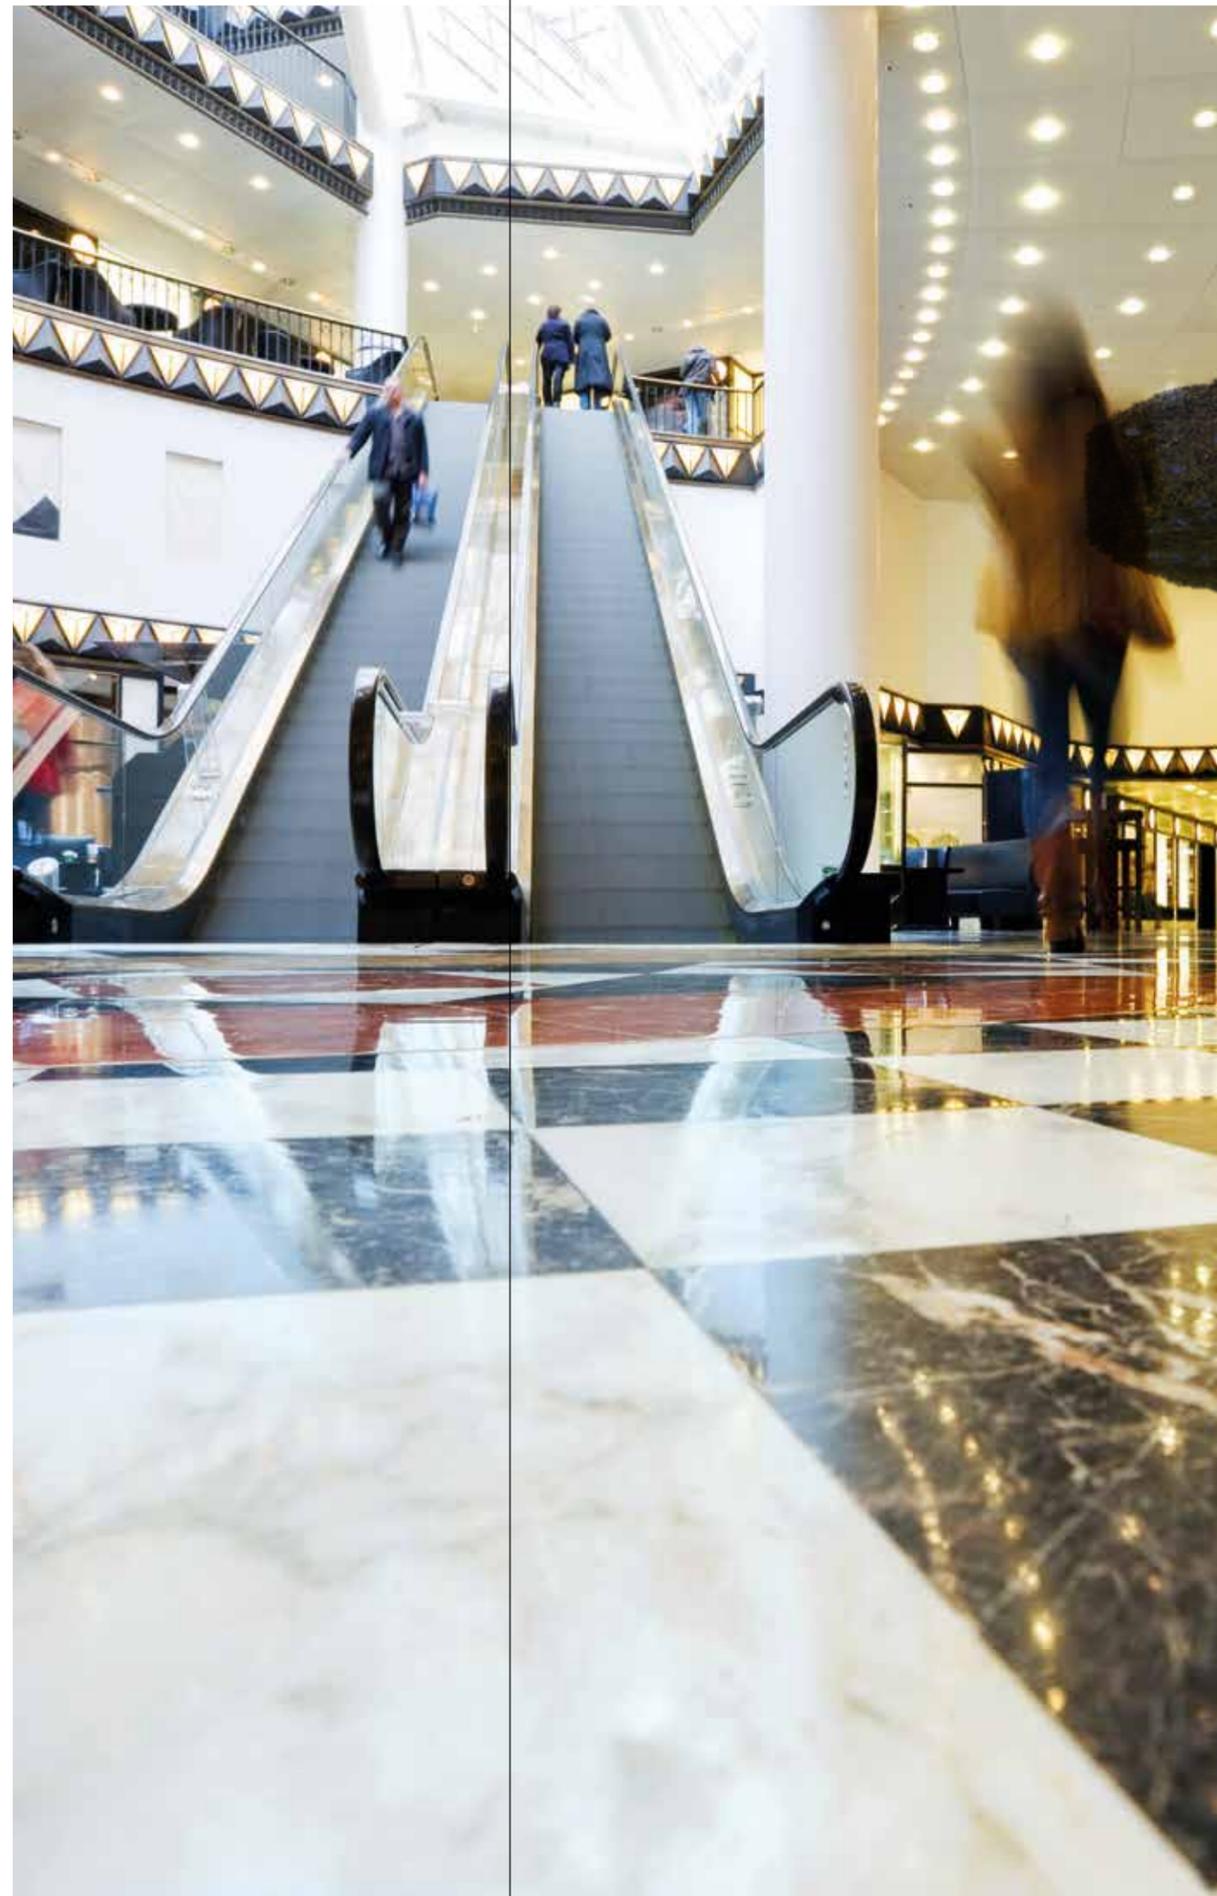

The microscopic image of the 3M Floor pad, in comparison to the competitor pad, clearly shows a more dense construction with a higher concentration of resin bubbles, holding the abrasive substrate. The 3M image also demonstrates a high level of abrasive distribution throughout the pad, unlike the competitor product that has clear gaps, less resin and poorer distribution.

Scotch-Brite™ High Shine Floor Pad

Nearest competitor

Not only are both sides of the Scotch-Brite high shine floor pads coated with mineral abrasives, but they are also unique in containing the abrasive within the pad itself.

Scotch-Brite™ High Shine Purple Floor Pad

- For floors with medium shine in good initial condition
- Cleans and polishes floors to a brilliant gloss finish
- Use for daily maintenance

The high shine, 2-pad system approach

If your floor appears to be worn or dull, use Scotch-Brite™ High Shine Sienna Floor Pad to help condition the floor and bring it to a medium gloss. Then, to further enhance the floor appearance, and bring it to a high shine, use the Scotch-Brite™ High Shine Purple Floor Pad. The gloss finish on the floor can be maintained through regular cleaning and conditioning using the new purple floor pad (wet or dry), in conjunction with an auto-scrubbing machine, low speed or high speed rotary floor machine.

Scotch-Brite™ High Shine Sienna Floor Pad

- For worn and dull floors* in poor initial condition
- Cleans, conditions and polishes to a medium shine
- Use occasionally for a deeper clean

Kinder on the environment

Scotch-Brite™ High Shine Floor Pads allow the maintenance and polishing of stone, marble and terrazzo flooring without the use of floor finishes and strippers, helping to eliminate the use of chemicals. Double-sided, washable and reusable, they last longer than existing high performance floor pads, helping to reduce landfill disposal.

* thermoplastic floor excepted

3M. Leading the way in responsible floor care solutions.

If you demand the highest standards of floor care, you should demand 3M for all your floor cleaning and maintenance needs. Our brand-leading solutions don't just keep dirt at bay; they clean and shine floors more thoroughly too, while reducing the need for cleaning labour and use of harmful chemicals.

Scotch-Brite™ Floor Pads

Considered the industry standard by cleaning professionals, Scotch-Brite™ Floor Pads strip faster, clean harder, shine brighter and last longer. With specialist solutions for marble, terrazzo, concrete, stone, wood and vinyl, 3M has all your floor cleaning and polishing needs covered.

3M™ Scotchgard™ Floor Protectors

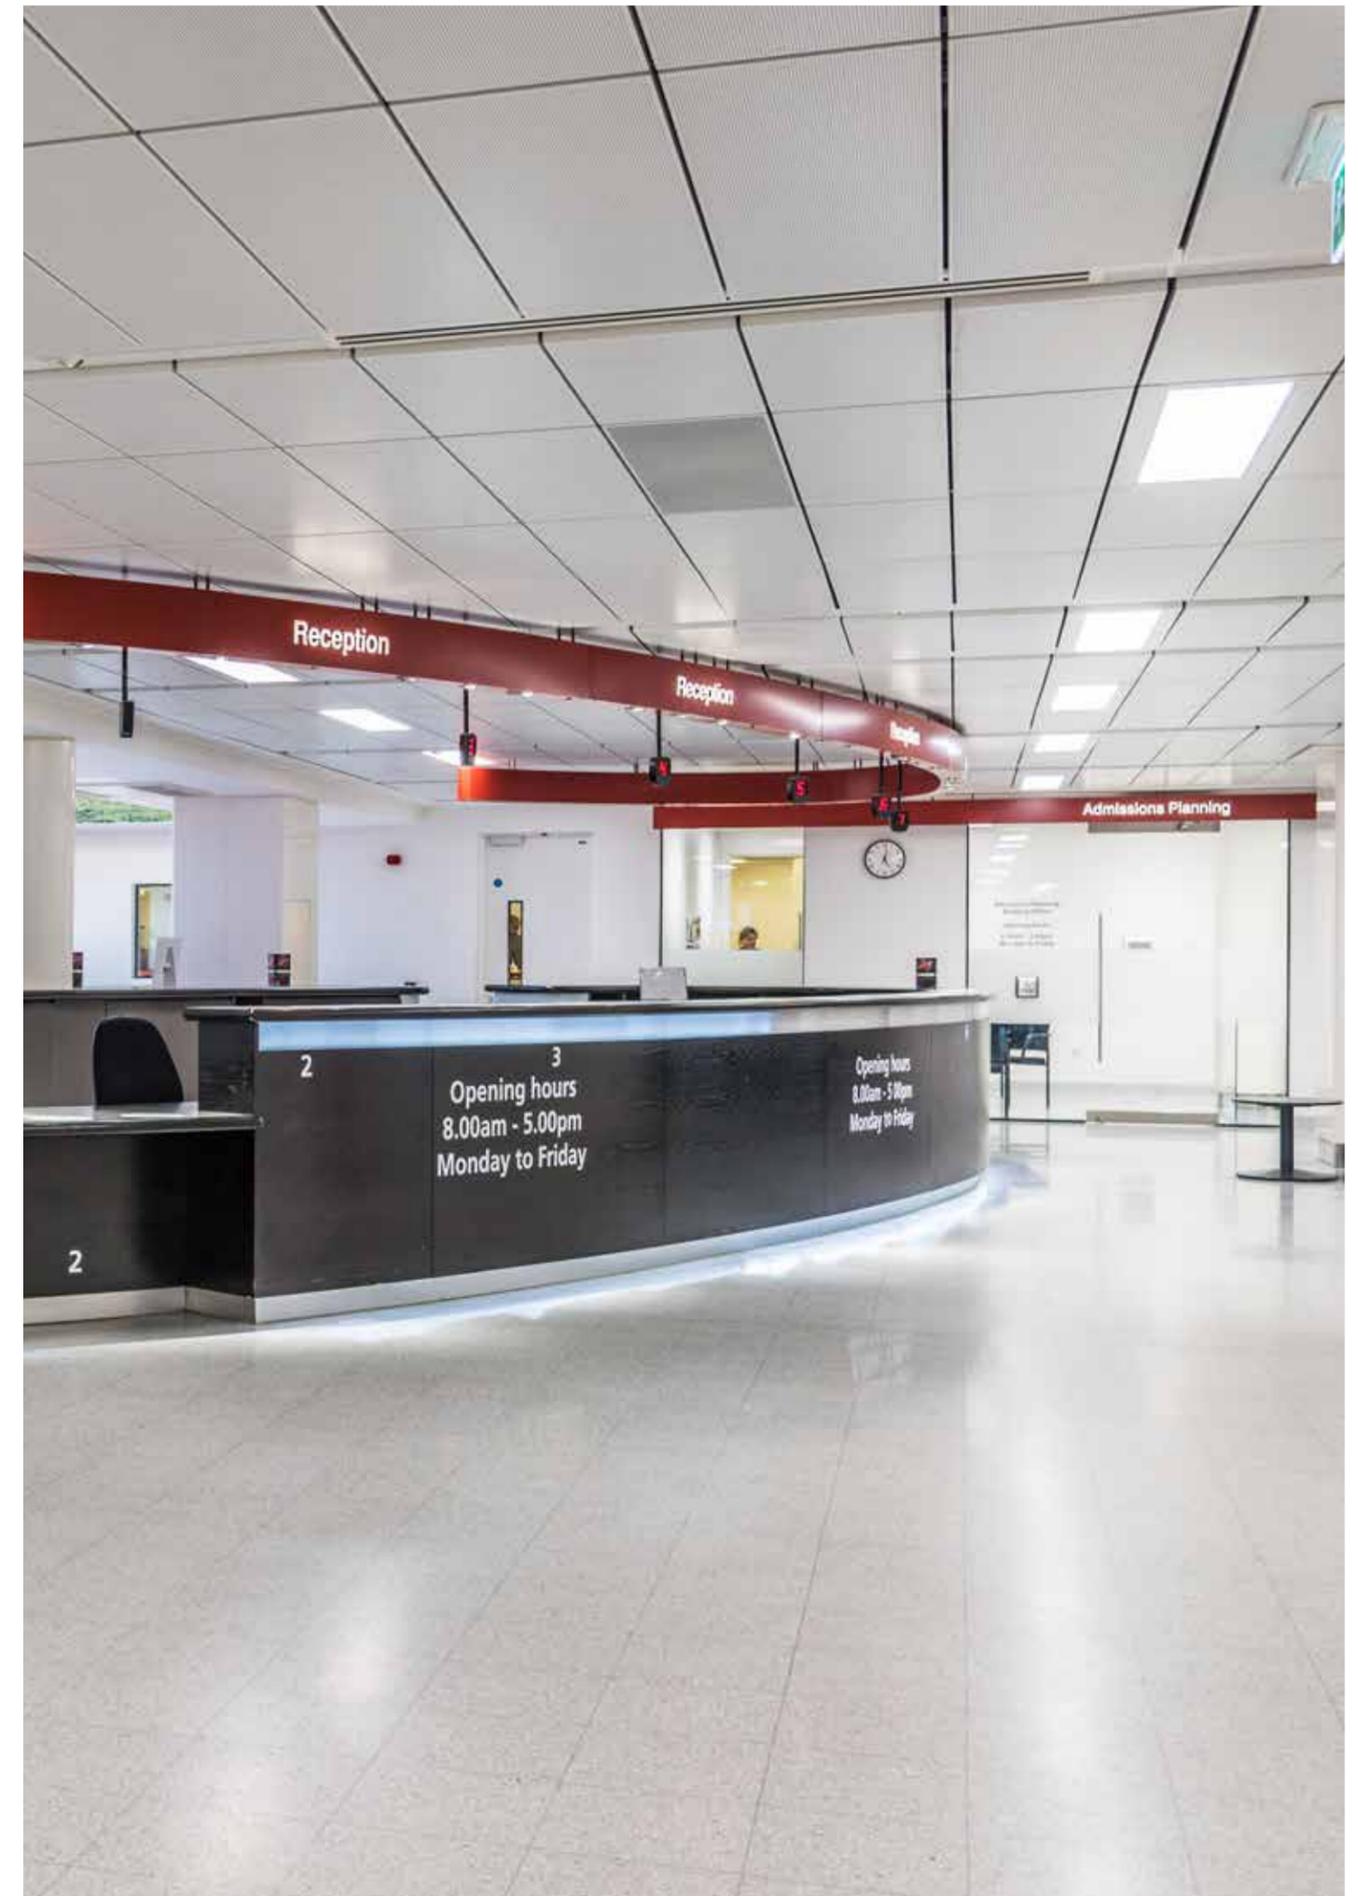

3M™ Scotchgard™ Stone Floor Protector can save you up to 60% on your annual floor care labour and chemical costs. Just two coats produce a clean, safe glossy floor that is less susceptible to scuffs, black marks, stains and scratches. Finished floors last up to a year with minimal maintenance – simply dust or wet mop for a clean, smooth floor with a beautiful shine.

3M™ Easy Trap Duster

3M™ Easy Trap Duster traps and holds 8x more dust, dirt, sand and hair than traditional mops and other disposable dusting systems. It's the most efficient way to dust the floor between coats of Scotchgard floor protector, and needs to be seen to be believed.
