Glass Finishes

3M™ Dichroic Glass Finishes

Inspiring a new spectrum of creativity.

The shimmering, color-shifting effect of dichroic glass is a magnificent addition to any space, but can also add substantial cost to a project. With 3M Dichroic Glass Finishes, the same brilliant effect can be achieved, with color shifting depending on the viewer's angle, plus simple application and at a fraction of the cost.

Made of premium materials, the shimmering textures are available in warm and cool tones. Want to create a completely new effect? Depending on mounting surface color, viewing angle and your lighting choice, 3M Dichroic Glass Finishes can take on a completely different look, defining your space in a altogether original way.

Just what you'd expect from 3M Architectural Markets, where state of the art meets high design.

3M Dichroic Glass Finishes produce dynamic effects and shifts in color on various mounting surfaces, lighting and viewing angles.
